

Seasons Village Offers Dream Lifestyle For Empty Nesters

By 2010, the 55-plus population in America will be the largest demographic for the first time in history. Controlling approximately 77 percent of the nation's disposable income, today's seniors are ready, willing and able to lead richer, more fulfilling lifestyles that include recreation, travel and community involvement.

To meet the requirements of this vibrant group of mature couples and singles, the maintenance-free community of Seasons Village in Troy has been designed with care. Offering an environment where neighbors are at the same stage of life with similar interests and needs, Seasons Village also provides the safety and intimacy of a gated community.

Each of the six available models are on individual home sites with detached, single-family homes. Homebuyers will find every model is designed to be on one level with no steps, thus they are wheelchair accessible as well as ADA adaptable.

Luxury features at this exclusive development with just 46 lots are as unique as they are sophisticated: ice/snow melting driveways and sidewalks; ceramic tile baths with heated floor in the master bath; walk-in showers; walk-in closets; home office option; spacious kitchens; plus many architectural features such as arches and niches, coffered ceilings and an abundance of windows.

The builder is giving homebuyers a lush landscaping package specially designed for each particular home. Buyers also can select from hun-

dreds of interior design options, including cabinets, flooring, hardware and more.

Without the burden of yard maintenance and other household responsibilities, Seasons Village residents will be free to take advantage of local amenities and activities, as well as those in St. Louis and the surrounding region.

Seasons Village is a brand new development offering true luxury living by RTR Development located in Troy at the corner of Bouse Road and Whitworth Drive. You may visit the display today or call (618) 288-3241 for more information.
